# **Kevin Kiragu**

Front-End Software Engineer

- ♠ kevinkiragu.netlify.com
- 🕥 github.com/Kevin-kirago

### Profile

I am a creative Front-End Web Developer with hands on experience in leveraging JavaScript to develop client-side based web applications and websites. I am also a huge enthusiast of Human Computer Interactions, I believe that the art of design is relevant in engineering the best user experiences and user interfaces.

Coupled with my desire to constantly expand my skill set, this drives me to always be improving my knowledge and giving my best in everything I do.

### Info

### **Address**

64167— 06100, Nairobi Kenya.

### **Phone**

+254 795 760 415

### **Email**

□

An Interactive social based website for project visualization. The project was aimed at helping a client organize and manage work samples and skills.

- Developed and Maintained code primarily using HTML, CSS/Sass, JavaScript and Bootstrap.
- Tested sites in various browsers and devices to ensure crossbrowser compatibility and mobile responsiveness .

### **ROOKIE ECOMMERCE SHOP**

∞ rookies-furniture.netlify.com

An Ecommerce website that simulates a real marketing web shop with high order functionalities (Shopping Cart).

- Developed and Maintained code primarily using HTML, CSS/Sass and Vanilla JavaScript.
- Modern design with good user experience.

# Skills

### **Programming Languages**

Javascript(ES6 and ES5) Type-Script, HTML, CSS/SASS Preprocessor.

### **Libraries & Frameworks**

jQuery, React and Redux, Bootstrap, Materialize.

### **Tools & Platforms**

Git, Gulp, npm, Webpack, Babel, Netlify, Heroku, Contentful,,

### **Interests**

Machine learning and Artificial Intelligence in relation to software development.

#### **MOVIE-STORE**

movie-shop.netlify.com

A Vanilla JavaScript project that is functional and data driven with provided content/data from the Movies DB API.

- The basis of this project was to consume the Movies DB API by rendering client side layouts.
- The project was based on a modern workflow by different tools such as Webpack for bundling code, Babel for script conversion and npm as task runner.

# Education

### St Paul's University

Diploma in Computer Science.

2018-2019

• Concentration in Human Computer Interaction and Software Engineering.
